Education

California State University Fullerton

B.S. Computer Science

Fullerton, CA

August 2023 - June 2025

Experience

Staples | Garden Grove, CA

Print and Marketing Associate | 01/2023 - 11/2023

- Took in customer orders via in person and through phone
- Completed customer print jobs within the given time
- Restocked printing machines with supplies when empty
- Provided excellent customer service by suggesting the right product for the customer
- Cleaned and sanitized the work space

Projects

Weather App

- Created a website using Javascript, html, and css where the user can enter a city and is returned with a display of the current weather for that city.
- Utilized the usage of fetching data from a weather API using promises where it is then used to update the content that is being displayed on the website.

To-Do-List

- Designed a website using Javascript and React.js that allows the user to add, delete, and move tasks.
- Implemented by using a ToDoList function based component and onClick and onChange events in combination with using useState from the react package.

Simple Calculator

- Engineered a simple calculator that allowed the user to input a simple expression and then calculated the results in the correct order of operations.
- Implemented by using a stack for numbers and a stack for left parentheses and operations that is then transferred to a separate file, where it is formatted in a way that the order of operations is carried out and is later used to evaluate the expression.

Skills

- **Languages:** Javascript, C++, MongoDB
- **Frameworks/Libraries:** React.js, node.js
- **Software:** Visual Studio Code, Microsoft Visual Studio, MongoDB Compass
- **Systems:** Windows
